The July Revolution of 2024 in Bangladesh marked a turning point in the nation's history. Initially sparked by students protesting the longstanding quota system, the movement soon became a powerful wave against the authoritarian rule, systemic corruption, that had built up over 16 years. The government, criticized for its deeply corrupt institutions and lack of accountability, responded with violent repression. In the early stage of the quota reform protests, the government's heavy-handed approach led to multiple student deaths, including those of Abu Sayed and Mugdha, and several others. This brutality ignited widespread outrage, and thousands took to the streets, transforming the student-led protest into a nationwide movement. Throughout the revolution, over a thousand students and citizens, including at least 67 children, lost their lives. By August 5, the people of Bangladesh had reached their limit and took to the streets in overwhelming numbers to oust the fascist regime. Being frightened, the fascist Prime Minister, along with family and close party members, fled the country, seeking shelter in neighbouring country, India. Following their departure, Nobel Laureate Dr. Muhammad Yunus answered the call of the people, assuming the role of Chief Advisor to an Interim Government on August 8. Luckily nobody was hurt. So road accident is like a curse in our life. This problem can be solved by all out efforts from both the authority and the general mass. Water pollution is the contamination (ଦୂଷଣ) of water. No living being can pass a moment without water. Hence water is an essential element of nature. But polluted water is very harmful as it causes death threatening diseases like diarrhoea, cholera, jaundice, etc. It can be polluted in many ways. Man pollutes water by throwing waste materials into it. Using chemical fertilizers and insecticides (କୌଟନାଶକ) farmers pollute water. Rain and floods wash away these chemical fertilizers and insecticides to rivers, canals and ponds and thus water is polluted. Poisonous (ବିଧାତ୍) chemicals are used in mills and factories. Throwing their waste products into rivers and canals, they pollute water. Steamers, boats and launches throw oil, food and human waste into the water of rivers and canals, and thus make the water polluted. Because of this pollution, fish cannot survive. People also become ill by drinking and bathing in the polluted water. By checking the dumping of factory waste, water pollution can be minimized. By burning down forest, they also make living place. But they are not aware of the harmful effects of deforestation. Due to deforestation, carbon dioxide is increasing. And so the weather pattern is being changed. The world is becoming warmer. The heat of the sun is trapped (ଆଟକା ପଡ଼ି) inside the atmosphere. As a result, the polar ice caps are melting. Some enjoy gossiping, some play pipes in the fields and some others sing songs. The children and women also come out to watch the moon-lit night. They become excited and amazed to watch the beauty of nature. The poets write poems about the moon-lit night. They describe it with their imagination. Even common people try to compose poems in such a splendid situation. A moon-lit night reminds us of the renowned song of Rabindranath Tagore "Chander Hashi Bandh Bhengechhe." I have a memory of experiencing a moonlit night at our village home when I went there during my summer vacation. On that night, the moon was beaming lavishly. The brightness of the moon's light was so heavy that it looked like almost day light. To see that brilliance of the moon's light, our joys knew no bound. Infact, a moonlit night is a blessing of the Almighty to all his dearly creatures.

It means the discontinuation (ব্যবাত) of supply of electricity. It occurs while generation of power falls short of demand. Due to rapid growth of population the demand of electricity has increased to a great extent while the generation of power has not risen expectedly. It mostly occurs in the pick hour of the day that refers to the time from 8 am to 11 pm. When load shedding occurs, the normal life of the people of that area comes to a standstill. It creates the problem of far reaching consequences in the socio-economic (আর্থ-সামাজিক) development of the country. Mills and factories, shops, hospitals come to a standstill. Housewives, students, patients and workers also fall a victim to it. They are also day labourers leading a miserable condition. In our country, a day labourer is not well paid. He works from sunrise to sunset and even late night. But he does not get expected remuneration (পারিশ্রমিক) from their owners. He is sun burnt with a mirth of having due wages. He is drenched with torrents like a storm crow. He shivers in the pinching cold to drag his hard life forward. Of course his joys know no bounds when he earns more. Then he shops with his basket full and returns to his shabby cottage where his diseased wife and some naked or half naked children wait for having some food. But the case is reverse when he goes on without any work. He wears a gloomy (বিষণ্ণ) appearance visualising the famished (না খেয়ে থাকা) mouths of his family. Then he is between two fires what to do for his family members awaiting food with rictus. The rigorous condition of our day labourers ought to be upgraded with the all out effort of both Govt and commoners.

**May Day (ମେ ଦିବସ)**

May 1<sup>st</sup>, International Workers Day, is observed as May Day. To commemorate the historic struggle of working people throughout the world the day is observed. From the beginning of the Industrial Revolution people in factories have worked very long shifts lasting up to fourteen or even more hours a day. In the 1880 a new movement (ଆନ୍ଦୋଳନ) calling for an eight hour day inspired (ଅନୁଷ୍ଠାନିତ କରା) both Labour Unions and unorganised (ଘସଂଗଠିତ) workers. The workers fought for some rights; a minimum wage, safety laws and the guarantee of eight hour workday. To establish these rights they launched a concerted movement against the prevalent (ବିରାଜମାନ) law and law enforcing and enacting agencies. As a result on May 3, 1889, police fired into a crowd of strikers at the McCormick Harvest Machine Company, Chicago, killing at least one striker, seriously wounding five or six others and injuring an undetermined number. All these are infeasible to be forgettable and all these have determined better working conditions, better pay and better lives for today's workers and this is the importance of the day.
